*Figure 2 : Interface of view.php*

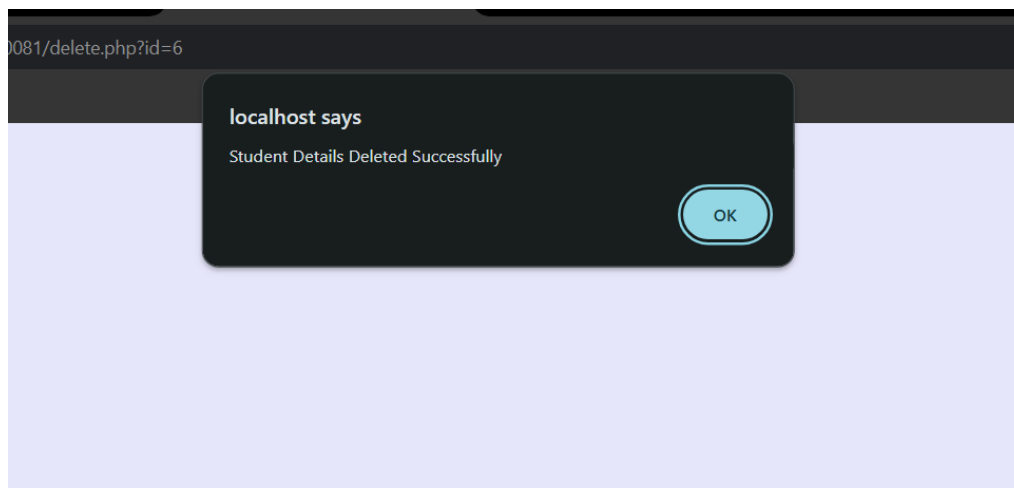

Figure 2 displays the interface that pops up for registered students list whereby all the details entered by students will be displayed for total student record registered.

The screenshot shows a web form titled "Update Student Details" on a light purple background. The form contains several input fields with pre-filled student information: Full Name (HARINI A/P SANGARAN), IC Number (041201-07-033), Email (harini.sangaran@gmail.com), Matrics Number (A23CS0081), Phone Number (017-9736279), Residential College (Short Form) (KTDI MA6), and Course of Study (Bachelor of Computer Scier). Below the fields is a yellow "Update Student Details" button and a purple link labeled "Back to Registered Students List".

*Figure 3 : Interface of edit.php*

Figure 3 displays the interface that pops up when edit button is clicked. The details of the student are readily displayed. The user only needs to make changes on the column that they wish to and click on the update button to edit the details.

*Figure 4 : Interface of delete.php*

Figure 4 displays the interface that pops up when delete button is clicked. An alert of "Student Details Deleted Successfully" appears when the user clicks on the delete button. Once the "OK" button is pressed, the student details are deleted from the database.
